

Innovative concepts and methods

Course digital transformation and industry 4.0

The advancing digitization demands appropriate knowledge and innovative education concepts. For the first time, we developed an educational program for the disruptive change in the office environment. The course starts in summer 2016 in Heilbronn.

The students will develop concepts for the digital mapping of business processes in companies. Previously they receive the necessary theoretical background on the way by LUTZ & GRUB AG:

- New Work/work 4.0
- Method skills
- Project management
- Quality management
- IT-Compliance
- Practical work in the cloud
- Office 365 basics
- Sharepoint online administration
- Practical workshop

- Company project work
