

Trainings offered

Focus on Industrial Sectors

Our scope of trainings offered is clearly focused on the IT sector as well as on project management. Every year approximately 200 IT specialists and project managers are being certified in order to advance in their careers, looking for new professional perspectives.

From Experts for Experts

Due to our specialization we guarantee further education and vocational trainings on the highest level, carried out by experts and apt for experts in the field of information technology as well as project management.

Microsoft Server Technologies

All our trainings offered certify in the area of Microsoft Server Technologies: Microsoft Windows Server 2012 (2008), Microsoft System Center Suite, Microsoft SharePoint Server 2013 (2010), Microsoft Virtualization Technologies.

Project Management

Get to know the methodology of project management according to internationally accredited standards and get a certification as Project Management Associate (International Level D). The certificate is being issued on behalf of the German section of the IPMA, namely the Gesellschaft für Projektmanagement (GPM – German Association for Project Management) after successful elaboration of a project thesis as well as an examination.
